

# LANDSCAPES IN ACTION

IMPACT NOTES #10, MARCH 2017

1 > **CANADA** > BAY OF FUNDY  
**Restoring a Rare Atlantic Salmon Population**

The Inner Bay of Fundy (iBoF) salmon have struggled to survive challenges largely attributed to increasing human activity. The Model Forest Approach comes to its rescue!

2 > **CUBA** > WEED INVASION  
**Make the Best of the Worst**

The Marabou weed is a highly aggressive invasive tree species in Cuba. Competing for space in protected areas, its presence hinders management and harvesting, significantly increasing costs.

3 > **CAMEROON** > BIO-FERTILIZERS  
**Eco-Friendly Organic Agro-Input Nurturing Local Economic Growth**

Facilitating the distribution of bio-fertilizers in the Campo-Ma'an (southern region) and Dja et Mpomo (eastern region) Model Forests in Cameroon: more cost-effective than chemical fertilizers!

4 > **SWEDEN** > TEATERMASKINEN  
**A Theater Machine in Sweden's Bergslagen Model Forest**

In the heart of Sweden's Bergslagen region, an independent theatre group is a partner of the Model Forest. "We have a vision of linking people to forests and providing them with an immediate connection to nature."
